

Terms And Conditions

Classification of Abnormal EEG Background Activity in Newborn Infants — 31 May 2022

One Account per team

Only one account per team should be used to participate.

If a team member wants to join a different team or separate teams wants to merge, please contact support@your_support_email.com

Team Limits and Rewards Split

A maximum of 5 individuals per team are allowed.

The prize will be awarded to the winning entry. The split of the prize to individual members of a team is something that should be agreed and managed by the team members themselves with no involvement from the Competition owner(s) or the platform admins.

Submissions Limits

The platform has a limit of 5 entries per day per participant (or team) regardless of the competition

Legal Age

It is not necessary to be of Legal Age (e.g. 18yo in Europe or 21yo in USA) to participate in a competition. However, prize money or rewards may require parental or legal guardian consent to be awarded. Depending on the circumstances, an alternative prize may be agreed with the competition owner.

Code Submission and Open-Source License

For your submission you are not required to use any specific tool or programming language. If executable code is submitted, please make sure to include a list of required packages to run your code in a requirements.txt file. If possible, containerise your code using Docker or a virtual environment.

You may upload your code or set of instructions to any hosting provider such as Google Drive, Dropbox etc. and share a link to it in your submission. Please do not use public repositories on Github, Gitlab etc. as they could be seen by other participants and give them an unfair advantage over the others.

It is important that you include detailed instruction on how to run your model and test your code in a readme file.

By submitting your code, you agree that this will be published with an open-source license.

Leaderboards

The competition will have a public leaderboard which is visible throughout the competition. At the end of a competition, the participants will submit their algorithms for testing using unseen, private data. Algorithms will be assessed and ranked according to performance. This private leaderboard, which will determine the winner, will be made public after the end of the competition.

The public leaderboard is a useful indication of the performance but not the definitive one.

As the scoring of the private leaderboard cannot be automated, this may require some time depending on the number of submissions received and their completeness / complexity of use. All participants will be informed whenever the manual scoring process is completed. We will also be in touch with the participants in case of issue scoring their submissions.

Participants communication

Communication regarding the competition will be carried out via email using the address support@your_support_email.com

Competition Timeline

The competition will run for a minimum of 6 weeks from the date of publication on infantresearchcommunity.ucc.ie

The organiser of the competition reserves the right to extend this period if needed to complete the scoring

process, increase the number of submissions or due to other causes beyond our control (e.g. natural disasters, pandemics, wars etc.)

Privacy and GDPR

All personal data processed by the competition owner, are GDPR compliant and will be kept for a maximum of 10 years from collection. Each individual may request access to their data and/or their irreversible elimination via email at: support@your_support_email.com

For more info on how data are collected and stored, how to avail of your rights and much more, please checkout the About section of this platform or visit firebase privacy policy here: <https://firebase.google.com/support/privacy/>

Exclusion Criteria

The following is a non-exhaustive list of criteria that will determine the exclusion of a participant or team from the competition. Participants and/or teams can be excluded at any stage of the competition due to the following.

Cheating

A participant will be excluded if caught cheating in any possible form: e.g. by hacking the platform, exchanging sensitive information regarding the competition with key stakeholders, exploiting platform vulnerabilities, violating the T&C, etc.

Affiliation with the Competition Owner / Development team

Current and past members of the INFANT Research Centre, University College Cork, Ireland are not eligible to participate in the competition

Countries

In light of recent geopolitical events and laws and regulations beyond our control, residents/citizens of some countries are not eligible to enter. Bank accounts from some countries are not payable and participants from these countries will also be excluded.

The following is a non-exhaustive list of non-eligible countries:

- Russia
- East Ukraine (Donetsk, Luhansk)
- North Korea

The list of countries may change. If in doubt, please consult your local authorities and send a detailed request of information to support@your_support_email.com

Criminal Activities

Any participant convicted of a criminal offence, or is affiliated to a criminal organization, cannot participate in the competition, either as an individual or part of a team.

If you're in doubt of your eligibility, please send a detailed request of information to support@your_support_email.com

Participation

By entering the competition you are agreeing to these Terms and Conditions. The Organisers reserve the right to remove participants at any stage of the competition if the spirit of the rules are not adhered to.

Redacted copy. This is a re-rendering of the Terms and Conditions issued to participants on 31 May 2022, prepared for the repository's static demo. The only change to the wording is the contact address, replaced throughout with the placeholder `support@your_support_email.com` used everywhere else in this repository. The original PDF is unmodified in the competition organisers' records.

Note on eligibility verification. The clause **Affiliation with the Competition Owner / Development team** above excludes current and past members of the INFANT Research Centre from participating. The competition was administered by a single host, and checking that condition against every registration was not practical. The check that was actually applied was narrower and was applied at one point: entrants with current or previous access to the ANSeR recordings or grades used in this competition were not eligible to

win the prize, and that was verified for the prize-winning entry during the manual validation stage rather than for every submission received. The paper describing the competition states this. This note is part of the repository's redacted copy and was not in the document issued to participants.
